

N. C. JINDAL PUBLIC SCHOOL

PRIMARY SCHOOL(2021-22)

REPORT – Awareness programme by Health & Wellness Club

As per the guidelines given by Directorate of Education, a step towards the prevention from vector borne diseases was taken under Health and Wellness Club on 1st and 2nd of July, 2021. Various activities for classes Pre-School to V were planned and executed. Students were apprised of the diseases through Teacher's Talk and a short video. Information regarding the vector borne diseases and the ways to prevent them was given to the children by their teachers. In Preschool and Pre- Primary, students prepared a collage on ' My Safety Guards'. Classes I-III had slogan writing and poster making activity. Classes IV and V made beautiful wall hangings of Do's and Dont's for the prevention of vector borne diseases. These activities helped in creating awareness amongst the students and sensitising them towards the cleanliness in their surroundings.
